The National Tsunami Warning Center issued a Tsunami Information Statement indicating no threat of tsunami from this quake. The California State Warning Center briefed all coastal counties.

#### **WEATHER**

#### **WEATHER SYNOPSIS BY REGION:**

#### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

Through the weekend, there will be afternoon clouds over the mountains with a slight chance of thunderstorms on Sunday as a trough moves over the area. Temperatures will remain mild with low clouds and drizzle impacting the coast and coastal valleys each night and morning.

#### San Francisco Weather:

A deep marine layer has allowed low clouds to spread well inland this morning. Clouds will slowly clear with afternoon highs from the 60s in the coast to lower 80s inland. High pressure will briefly build on Sunday with a modest warming trend. Temperatures will reverse on Monday with a few degrees of cooling as the next upper low approaches the coast. A warming trend should develop Tuesday through Friday as high pressure builds, the marine layer compresses, and onshore flow weakens.

## CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY Sacramento Weather:

A week upper trough will remain over the West Coast through the middle of next week. Daytime temperatures are expected to remain a few to several degrees above normal and will vary as weak disturbances rotate through the trough. One of these disturbances will generate a threat of thunderstorms over the northern mountains Sunday with this thunderstorm threat shifting southward to all higher elevation mountains within the forecast area Monday through Wednesday. High pressure building over the West Coast will bring an end to the shower threat and warmer temperatures by the end of next week.

#### **Hanford Weather:**

A weak upper level trough of low pressure will remain along the coast today and produce a moderate onshore flow across the forecast area. There is a slight chance of isolated afternoon and evening thunderstorms over the High Sierra Nevada north of Kings Canyon through most of next week as the upper level trough moves inland.

#### **WEATHER SYNOPSIS BY REGION: (Cont.)**

#### **SOUTHERN CALIFORNIA:**

#### Los Angeles Weather:

A series of troughs will move over the forecast area through next week. Onshore flow, increasing marine layer, and near normal temperatures are expected through the period.

## Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

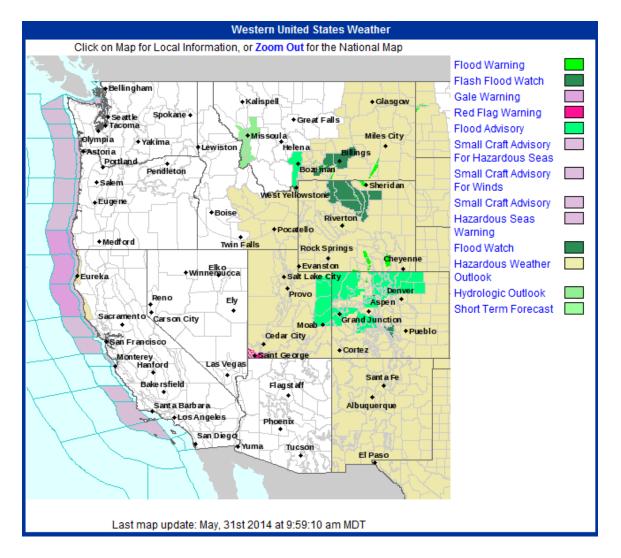

Dry southwest flow aloft and high pressure over northwest Mexico will bring warm weather to Southern California this weekend. Areas of night and morning clouds will be confined to the coastal zones. Gusty west winds will continue through the mountain passes into the deserts. Low pressure deepening along the West Coast next week will bring cooler days and more widespread marine clouds and fog.

#### **Southeast California Weather:**

Very warm temperatures will prevail across the region this weekend into next week as dry southwesterly flow takes shape across the area. With mostly clear conditions, afternoon temperatures will climb into the lower to middle 100s each afternoon through the end of next week.

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is 0800-1700 hours.

#### Cal EOC Incident - 2014 Drought

#### **Situational Summary**

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue without substantial rainfall, severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

On April 25, 2014 Governor Brown released an Executive Order on Friday enabling several urgent actions to be taken as the drought persists into the state's traditional dry season.

\*\* As this rainy season comes to an end, it is highly unlikely that precipitation totals will increase significantly over the coming months. This winter's below average rain and snowfall worsens conditions in this third straight dry year.\*\*

#### **Situational Summary (Cont.)**

- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- The final manual snowpack survey of the season was conducted on Thursday (May 1) and showed California snowpack at 18% of normal. A more recent update using automated devices shows snowpack at 5% of normal as of May 23.
- DWR has announced that water essential for health and safety will be delivered through the state water project. The current State Water Project Allocation is 5%.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
